4000-D Dome Splice Enclosure

PROUDLY MANUFACTURED IN THE USA

Product Description

The Starfighter 4000-D Dome Splice Closure is designed for above or below grade applications and supports up to 6 or more cable entries. The closure has a unique Split End Plate system that allows for mid accessing cable up to 1.125" in diameter. Branch or lateral cables can be added to any one of four compression seal entry ports. Multiple cables (up to 6) can also be installed utilizing multi-port grommets available for the closure. The closure requires no special tools, adhesives, or mastics for installation. Integrated slack storage and hinged trays allow for maximum storage and access of fiber and fiber bundles. Splice capacity of 288 single fusion splices using the 4072-SSTP tray 36 splice.

Features & Benefits

Utilizes a Multicentric grommet, enabling numerous cable sizes to be used
Split end plate design allows for mid-span cable access
Four branch or lateral cable ports designed to support single or multiple cable entries
Compression sealing system for branch or lateral ports, providing a tight seal and a strain relief
Can accommodate strand, wall, pedestal, or ADSS mounting brackets
