FIBERFOX

Fiber optic connection system

EXPANDED BEAM SOLUTIONS

FIBERFOX Expanded Beam Fiber Optic solutions are designed to operate in extremely harsh environments, they use non-physical contact fiber optic termini that are behind an anti-reflective coated ball lens. This lens expands the beam to many times its original size aiding optical alignment and minimizing the effects of dust, debris and other environmental conditions.

With this technology it is possible to regularly disconnect and reconnect outdoor fiber optic connection, with a significantly lower risk of contaminating the sensitive fiber end surface. It is also possible to transmit signals over 360° rotating systems.

FIBERFOX expanded beam solutions make reliable optical connections possible in a variety of heavy-duty areas, like:

- Mining, above or below ground
- Tunnel boring
- Industrial plants in outdoor areas
- Inter-carriage in railroad applications
- Optical connections in docking systems
- Wind turbines in the renewable Energy sector
- Robotics with 360° rotation

CORE TECHNOLOGY EXPANDED BEAM

Expanded beam fiber optic connectors utilize a lens to expand and collimate the light emitting from an optical fiber. This collimated light beam is transmitted through an air gap to a mating connector, where the light is collected and focussed by a second lens into a second optical fiber to complete the connection. Like shown below.

of around 3.600 times larger than the original 50 μm multimode fiber core.

The effect of collimating and greatly increasing the beam diameter, means that the connector is less sensitive to small particles of dust or other contamination which could completely obscure transmission in physical contact type connectors.

With 50/125 multimode fiber, the expanded and collimated light beam has an active area

NEUTRIK FIBERFOX SOLUTION

Multimode

The following diagram is a scale representation of physical contact and expanded beam diameters showing typical contaminant sizes:

Clean Surface	Contaminated	Result
		Dust Particle of $\varnothing = 100 \mu\text{m}$ can cover the full transmission core of the fiber and cleaning is mandatory.
		Dust Particle of $\varnothing = 100 \mu\text{m}$ covers 3.33 % of the lens surface and 90 % of the transmission power is still given.

● Dust Particle $\varnothing = 100 \mu\text{m}$

foxBRID 2CH

- Very rugged plug face
- Insensitive to electromagnetic influences
- No splicer, no expertise required for Installation
- Very compact design - fits into industrial modular connectors
- Easy patching with common LC patch Cords
- Extremely service-friendly and reliable

NO2M4RW-FX

Technical Information

Gender	Hermaphroditic
Channel	2
Insertion Loss	Typical 0.9 dB / connection Maximum 1.45 dB / connection
Return Loss	N/A
Wavelengths	850 nm / 1300 nm
Lifetime	> 10'000 mating cycles
Locking device	Screwed & Dependent to Modular locking device
Vibrational resistance	Acc. to IEC 61300-2-1 & 61373, Category 1 – Class B
Shock resistance	Acc. to IEC 61373, Category 1 – Class B
Compatibility	MIL-DTL-83526
Flammability	UL94 V-0
Protection class - front side	IP68
- rear side	IP20
Temperature Range	-40° C to +85° C

foxBRID 4CH

- Very rugged plug face
- Insensitive to electromagnetic influences
- No splicer, no expertise required for Installation
- Very compact design - fits into industrial modular connectors
- Easy patching with common LC patch Cords
- Extremely service-friendly and reliable

NO4M4RW-FX

Technical Information

Gender	Hermaphroditic
Channel	4
Insertion Loss	Typical 0.9 dB / connection Maximum 1.45 dB / connection
Return Loss	N/A
Wavelengths	850 nm / 1300 nm
Lifetime	> 10'000 mating cycles
Locking device	Screwed & Dependent to Modular locking device
Vibrational resistance	Acc. to IEC 61300-2-1 & 61373, Category 1 – Class B
Shock resistance	Acc. to IEC 61373, Category 1 – Class B
Compatibility	MIL-DTL-83526
Flammability	UL94 V-0
Protection class - front side	IP68
- rear side	IP20
Temperature Range	-40° C to +85° C

Rotary Joint

- Rotor supported by double deep groove ball bearings
- Extremely long service life with 500 million revolutions
- Easy integration with common ST patch Cords
- Robust and compact design with stainless steel parts
- IP56 protection - two hermetically dust-tight chambers sealed by shaft seals
- Extremely service-friendly and easy greasing replacement for double service life
- Reflective coated optics for wavelengths from 850nm to 1300nm

NORJ50M3-FX

SCRJ-FX

Technical Information

Rotation Speed	Max. 5.500 rpm
Lifetime	500 Mio. revolutions
Outer Diameter	Ø 42 mm
Stator Outer Diameter	Ø 32 mm
Rotor Diameter	Ø 25.5 mm
Total length	60.2 mm
Weight	230 g
Insertion Loss - regular	Typical 1.0 dB / connection Maximum 1.5 dB / connection
Insertion Loss - @ 30 rpm	≤ 1.0 dB / connection
Return Loss	N/A
Wavelengths	850 nm / 1300nm
Protection class	IP56
Temperature Range	-40° C to +75° C
Optical connector	ST
Shell material	Stainless Steel
