INNOVATORS IN PRODUCT DESIGN

Description

Centerline Shelf (Solid)

SKU

1907-3-001-03A

Dimensions

19" X 5.25" X 24"

The Kendall Howard Rack Mounted Centerline Solid Shelf is one of the strongest most stable shelves on the market. Unlike most centerline shelves, which may "teeter", our centerline shelf is rock solid. The mounting flanges are not only press welded onto each side but wrap completely around the bottom to give it unprecedented stability and strength. This patent pending design will truly prove to be one of the strongest racking components you can own.

This shelf is designed for two-post (Telco/Relay) racking systems and is EIA compliant in design. Retaining flanges on all four sides will help to ensure that your components will stay exactly where you put them.

As with all of our shelving units, this shelf is made from 14-gauge (.074 Steel) and formed by hand one bend at a time for the highest quality.
